Nidec
All for dreams

All for dreams

#1 for advanced motor and drive technology

Nidec Corporation is a global manufacturer of electric motors and drives. Founded in 1973, Nidec has worldwide operations and a workforce of more than 110,000 who develop, manufacture and install motors, drives and control systems in industrial plants, automobiles, home appliances, office equipment and information technology.

CONTROL TECHNIQUESTM

DRIVE SPECIALISTS SINCE 1973

Industries which require the use of electric motors, and therefore drives, will form the backbone of the world's economy in the future. We will put great emphasis on research and development. As an R&D engineer myself, I know that it is technology which will ensure our businesses succeed.

Shigenobu Nagamori, Founder of Nidec

Outstanding performance

The outstanding performance of our drives is the fruit of over 45 years of engineering experience in drive design.

Technology you can rely on

Robust design and the highest build quality ensure the enduring reliability of the millions of drives installed around the world.

Open design architecture

Based on open design architecture, our drives integrate with all primary communication protocols.

Embedded intelligence

Precision motor control is combined with the highest embedded intelligence, ensuring maximum productivity and efficiency of your machinery.

Global reach, local support

Highly experienced, locally based Application Engineers design and support drive technology to provide maximum value, wherever you are in the world.

Servo solutions for continuous and pulse duty applications

Control Techniques' servo solutions provide ultimate performance and flexibility for machinery manufacturers: a range of fully integrated drives from 0.25 kW through to 2.8 MW, from open loop motor control through to maximum performance servo control. With integrated PLC technology, matched motors plus a wide range of options to extend functionality and real time communications, Unidrive M700 and Digitax HD offer extensive scalability in a comprehensive drive range.

Unidrive M700

Unidrive M700, with high performance and an extensive power range, is the ideal option for continuous duty applications, where precise, continuous torque delivery is required.

Digitax HD

The new Digitax HD range brings ultimate performance to high dynamic, pulse duty applications, where high peak torque is required for fast acceleration.

Unimotor

Unimotor is a comprehensive family of high performance AC brushless servo motors.

With a wide torque range, from 0.72 Nm up to 136 Nm, rated speeds from 1000 rpm to 6000 rpm, several inertia levels and a broad selection of feedback options, Unimotor offers the perfect fit for any application requirement.

Various mounting arrangements and a single cable option provide additional flexibility, while drive integration with electronic nameplate offers ultimate ease of use.

SERVO DRIVE SERIES

Digitax HD

Digitax HD extends the Unidrive M range with maximum servo performance in a minimum size package. Optimized for high-dynamic applications, Digitax HD provides the flexibility of both standalone and modular configurations. The drive offers full servo control plus open loop permanent magnet motor and induction motor control across four functionality levels: EtherCAT, MCI machine control, Ethernet and the flexible Base drive.

Unimotor HD

Unimotor HD is Control Techniques' high dynamic brushless AC servo motor range. With high peak torque, low inertia and the most compact dimensions, Unimotor HD is optimized for applications requiring rapid acceleration and deceleration.

Actual size

**Just 40 mm**

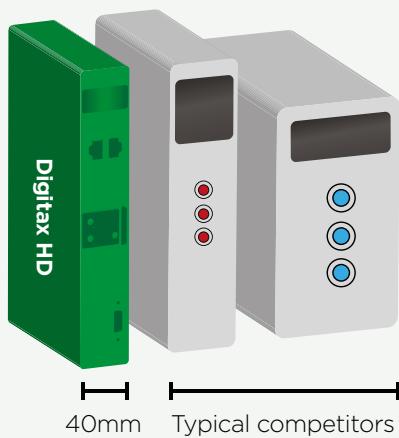

Minimum size servo solutions

Reduce cost and maximize floor space

Minimal footprint and exceptional power density make Digitax HD one of the **smallest servo drives** on the market today. This means that you can build the most compact cabinets possible.

The market's narrowest servo drive

- Digitax HD is just 40mm wide
- 25 drives, up to 16A per channel, can fit in just 1 meter of cabinet space

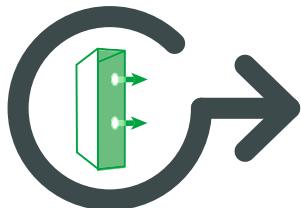

Drive dimensions at a glance

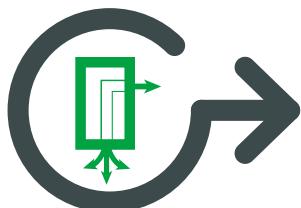

Dimensions	Frame 1	Frame 2	Frame 3
Width (mm)	40 mm	40 mm	40 mm
Depth (mm)	174 mm	174 mm	174 mm
Height (mm)	233 mm	278 mm	328 mm
Nominal current @ 400 V	4.2 A	10.5 A	16 A
Peak current @ 400 V	12.6 A	31.5 A	48 A

Reduce cabinet size with Ultraflow™ thermal management

Reduce cabinet height by directly stacking rows of drives. Control Techniques' patented Ultraflow™ technology expels heat directly outside of the cabinet through the rear of the drive* and removes heat build-up in the cabinet.

Combined with conformal coating, Ultraflow™ minimizes contamination risk as a result of guided internal airflow, which prevents ingress on drive circuits.

An intelligently controlled fan minimizes acoustic noise and optimizes fan lifetime, while contributing to the maximum thermal cooling by Ultraflow™.

Ultraflow™ requires only a 32 mm hole in the cabinet meaning rapid, trouble-free installation**

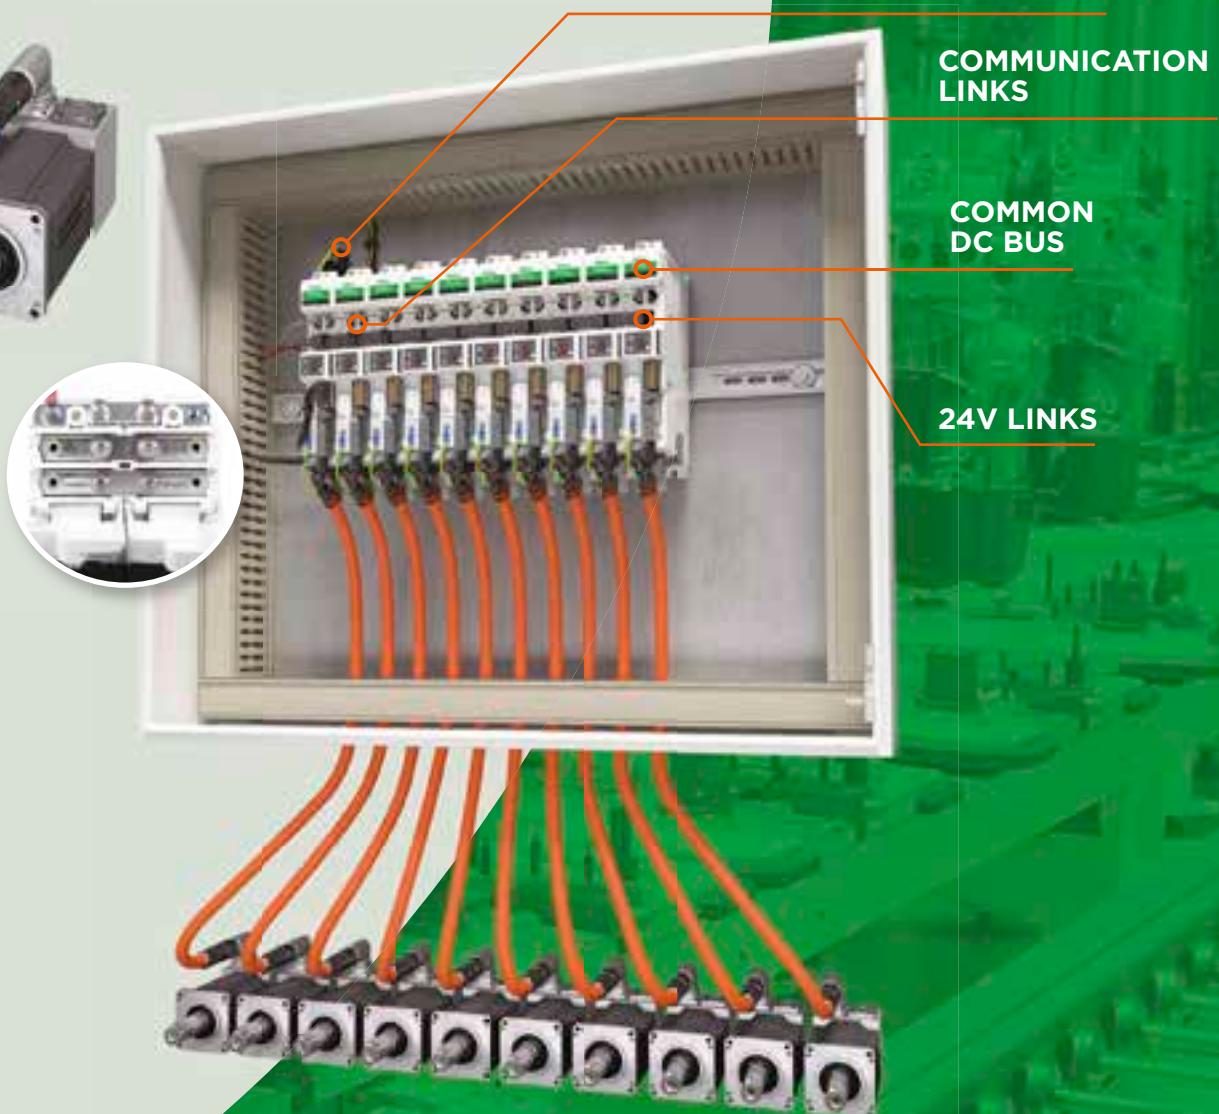

* Drive heat dissipation can also be achieved via vents on top of the drive, as standard.

** Frames 2 and 3 require 2 x 32mm holes

**From
standalone...**

**...to a modular
common dc
bus system**

PERFORMANCE

SPEED

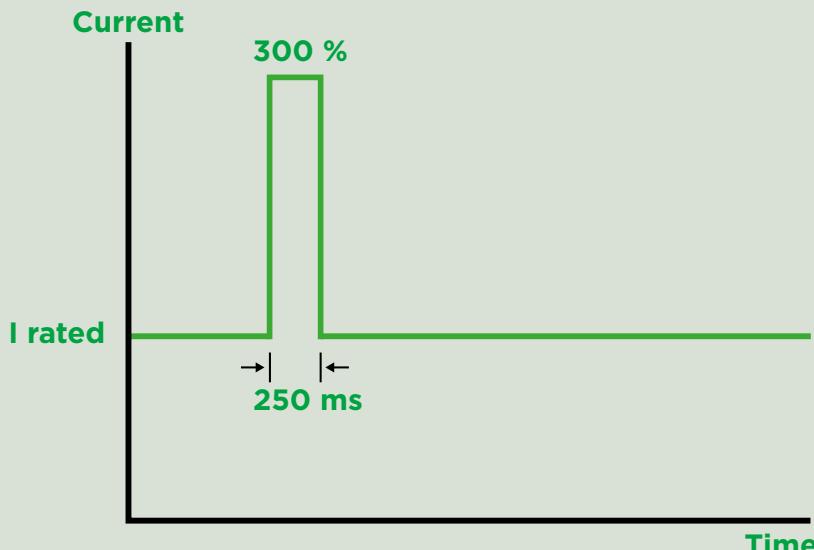

PRECISION

Maximum performance servo solutions

Boost throughput with maximum control

Optimized for high-dynamic applications and with high speed control loops, Digitax HD is one of the best performing servo drives on the market today. This means maximum throughput and product quality from your machines.

- 300% peak current performance
- Optimized control loops for high dynamic performance
 - 62.5 µs current loop
 - 250 µs position and speed loop
- Unique 'dead beat' current controller for maximum bandwidth
- Up to 16 kHz switching frequency (default ratings specified at 8 kHz)
- Notch filter for suppression of mechanical resonances

Improving accuracy through precision encoder feedback

Flexible speed and position feedback interface supports a wide range of feedback technologies, from robust resolvers to high resolution encoders

- Up to three onboard encoder channels simultaneously e.g. 1 feedback encoder, 1 reference encoder and 1 simulated output
- Quadrature, SinCos (including absolute), SSI, BiSS, EnDat (up to 4 Mb with EnDat 2.2) and resolvers
- Simulated encoder output can provide position reference for CAMs, digital lock and electronic gearbox
- Up to 25 bit encoder resolution
- Feedback accuracy as low as ±20"

motor and drive

Rapid installation and commissioning

The multi-axis paralleling kit includes busbars for quick connection of DC bus and earth link, as well as Quick Links to distribute 24 V supply across drives.

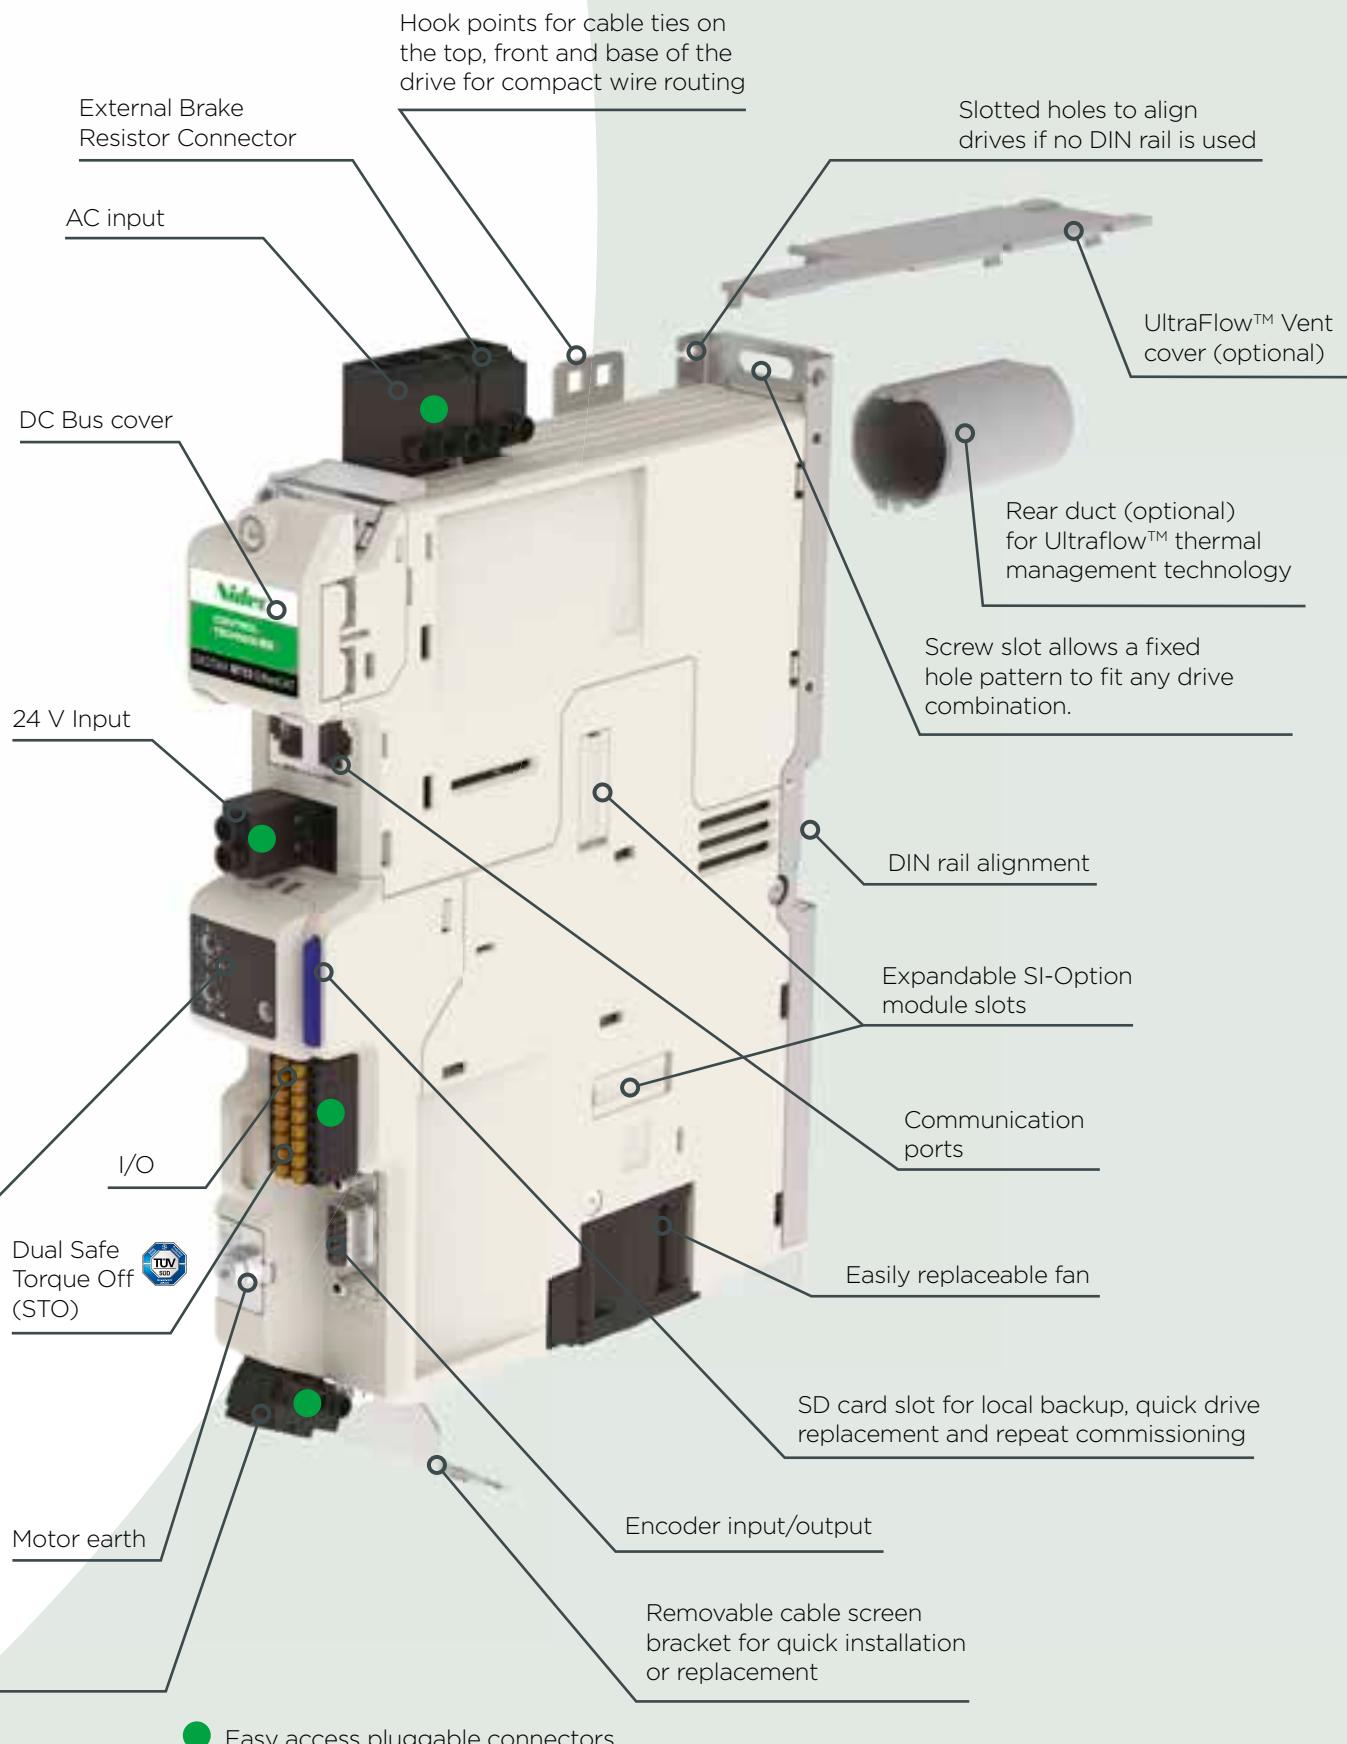

- Reduces installation time and cost
- Improves energy efficiency and footprint

The display (built-in on M753, optional on M751) ensures access to drive diagnostics even in the absence of network connectivity.

Includes 2 rotary switches for hardware setting of the node address for faster commissioning of the motion network.

The 25 degree angle cutaway at the base of the drive ensures the same position for the motor power connector for all frame sizes, making cable routing easier and tidier.

● Easy access pluggable connectors

SOFTWARE

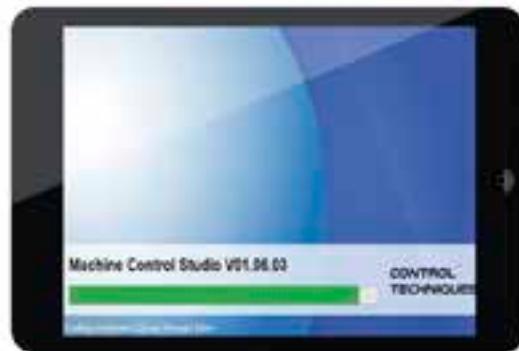

Fast programming and commissioning

Programming Machine Control Studio

Machine Control Studio, built using an IEC61131-3 programming environment, provides a flexible and intuitive environment for programming automation and motion control features.

The software provides programming for:

- Onboard PLC
- Digitax M751 fitted with MCi200 or MCi210 integrated machine control modules
- Ethernet network data configurations

IEC 61131-3 motion and automation programming

The programming environment is fully IEC 61131-3 compliant and therefore familiar, fast and easy to use for control engineers around the world.

The following IEC 61131-3 programming languages are supported:

- Structured Text (ST)
- Function Block Diagram (FBD)
- Structured Function Chart (SFC)
- Ladder Diagram (LD)
- Instruction List (IL)

Also supported:

- Continuous Function Chart (CFC)
- Intuitive IntelliSense functionality helps to write consistent and robust programs speeding up software development
- Programmers have access to a vibrant Open-source community for function blocks
- Machine Control Studio also supports customers' own function block libraries

Features	Digitax HD onboard PLC	MCi Option Module
Breakpoints	-	Yes
Source code upload/download	-	Yes
Online change	-	Yes
Trigonometric functions	-	Yes
64 bit data types	-	Yes
Real-time task(s)	Yes (min 4ms)	Yes (min 250 µs)
Customizable drive menu	Yes	Yes
Variable tracing	-	Yes
Tasks available	1 x Freewheeling task, 1 x Position task, 1 x Initial task, 4 x Clock tasks, 1 x Error task, 4 x Event tasks	1 x Freewheeling task, 1 x Position task, 1 x Initial task, 4 x Clock tasks, 1 x Error task, 4 x Event tasks
Centralized controller	-	Yes
Decentralized controller	Yes	Yes

Commissioning Connect

The Connect PC tool is for rapid commissioning, plus optimizing and monitoring drive/system performance.

- Task-based drive operations are simplified with intuitive graphical tools in a familiar Windows environment
- Autotune ensures the best performance by measuring machine dynamics and automatically optimizing control loop gains
- CTScope – a realtime software oscilloscope – is supplied for tuning and monitoring
- Dynamic drive logic diagrams and enhanced searchable listings tool is scalable to match application requirements
- Multiple communications channels for a more complete overview of the system
- Drive discovery gives the ability to find drives on a network automatically without the user having to specify their addresses
- Offline configuration

SD card

Standard SD cards can be used for quick and easy parameter and program storage.

Drive Set-Up

Quickly find everything you need for quick and easy installation of your drives.

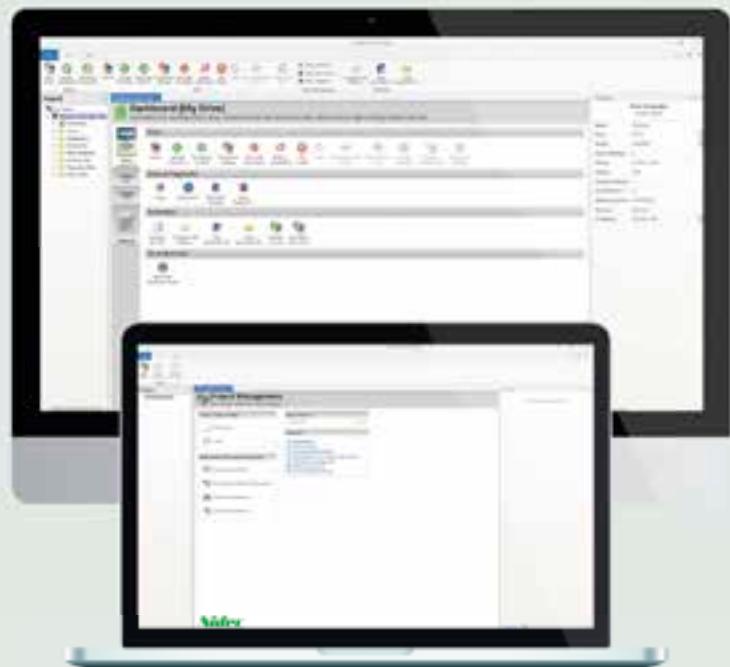

Visit: www.drive-setup.com

Diagnostics tool

Quickly solve any error codes that the drive may show.

You can download our Diagnostics Tool app at: www.controltechniques.com/mobile-applications

M751 Base

Base drive for configuration flexibility

Digitax M751 flexibility

Two option slots for functionality extension and customization – refer to page 29 for the comprehensive option module list

Built-in RS485 communications

Onboard Advanced Motion Controller for distributed 1.5 axis motion control

Analog and pulse/direction control for centralized motion

Reduced downtime with machine safety

- Integrated Dual Safe Torque Off
- Meets SIL3 (Safety Integrity Level 3) and PLe (Performance Level e)

Advanced Motion Controller onboard

Advanced 1.5 axes motion controller, key features include:

- Real-time tasks
- 250 µs cycle time
- Motion profile generator
- Electronic gearbox
- Interpolated CAM
- Homing functions
- High speed position freeze

Can be configured using the Connect PC tool or the remote keypad

SIL3
Safety Integrity Level

M751 + MCi210

Intelligent drive for decentralized motion applications

Digitax M751 plus MCi210 Machine Control

MCi210 Machine Control module for complete standalone capability, removing the need for an external controller

Provides a complete machine or sectional control solution

Faster throughput due to position loop @ 50 µs and use of Real Time Motion over Ethernet

Synchronized peer-to-peer communication over Ethernet

Single drive with MCi210 can control multiple axes using RTMoE (see page 18)

Programmable with IEC61131 standard languages using Machine Control Studio

Reduced downtime with machine safety

- Integrated Dual Safe Torque Off
- Meets SIL3 (Safety Integrity Level 3) and PLe (Performance Level e)

MCi210 features

Two Ethernet ports with an internal switch

Support for standard Ethernet protocols, along with RTMoE for PTP (IEEE 1588) synchronization

Modbus TCP/IP master (up to 5 nodes)

Parallel interface with drive processor provides faster data exchange

SIL3

M751 + SI-Ethernet

Network drive for centralized and decentralized motion applications

Digitax M751 plus SI-Ethernet

Support of real-time Ethernet (IEEE 1588 V2 Precision Time Protocol), HTTP, SMTP, EtherNet/IP and Modbus TCP/IP

Onboard advanced motion controller for distributed 1.5 axis motion control (see M751 Base, page 16, for more details)

Synchronized peer-to-peer communication over Ethernet

Reduced downtime with machine safety

- Integrated Dual Safe Torque Off
- Meets SIL3 (Safety Integrity Level 3) and PLe (Performance Level e)

Open, efficient, synchronized Ethernet

Maximize machine productivity through high performance deterministic Ethernet

Access future developments in IT-based industries where billions of nodes are installed, future proofing your investments

Ethernet web pages hosted on the SI-Ethernet option module

RTMoE

Digitax HD's standard Ethernet also supports RTMoE (Real-Time Motion over Ethernet) which provides synchronized communication between drives using the Precision Time Protocol as defined by IEEE1588 V2:

Distributed clocks are used to automatically synchronize the position, speed and current loops across all drives

1 ms cycle time for synchronous cyclic data

High speed network synchronization of less than 1 μ s jitter (typically <200 ns) and 1 ms cycle time for synchronous cyclic data

SIL3
Safety Integrity Level

M753 EtherCAT

EtherCAT device for centralized motion control applications

Digitax M753 EtherCAT

Digitax M753 features an integrated 2-port EtherCAT switch for easy integration in centralized motion control applications

EoE (Ethernet over EtherCAT) support allows PC tool connection for commissioning and monitoring over the EtherCAT network

The station alias can be dynamically assigned by the EtherCAT master, or hardwired with the two rotary switches built in the display

An optional RS485 adaptor is available, providing a back-up PC tool connection in case of network failure

High performance with flexibility

Operate with any automation product via EtherCAT

- Operate with motion controllers, motion PLCs and Industrial PCs via built-in EtherCAT
- Dual 100Mbps EtherCAT interfaces for use with in-line topologies
- Non-cyclic data communication using the CoE mailbox

Flexibility for all applications achieved through full access to drive functions

- CANopen over EtherCAT (CoE) including:
 - > CIA-402 profile
 - > Cyclic sync position mode
 - > Interpolated position mode
 - > Velocity mode
 - > Profile torque mode
 - > SDO access to all profile objects and drive parameters

Reduced downtime with machine safety

- Integrated Dual Safe Torque Off
- Meets SIL3 (Safety Integrity Level 3) and PLe (Performance Level e)

SIL3

Option module flexibility

Our innovative design means you only increase drive size when option modules are used, therefore **achieving significant space saving** in the overall configuration.

Adding the option mounting bracket **only adds an additional 22 mm width**, providing a highly competitive maximum drive width of 62 mm.

Option modules

Digitax HD supports a range of communications, I/O, feedback and machine control option modules.

Feedback

SI-Universal Encoder

Encoder input and output interface supporting Quadrature, SinCos, EnDat and SSI encoders.

SI-Encoder

Quadrature encoder input interface module.

I/O

SI-I/O

Extended I/O interface module to increase the number of I/O analog and digital points on a drive.

Communications

SI-EtherCAT

SI-PROFINET

SI-Ethernet*

SI-DeviceNet

SI-CANopen

SI-PROFIBUS

* Support of real-time Ethernet (IEEE 1588 V2 Precision Time Protocol), HTTP, SMTP, EtherNet/IP and Modbus TCP/IP

Applications with PLC or Motion Functionality

MCi200

Advanced machine control using industry standard IEC61131-3 programming languages

MCi210

Extended advanced machine control using industry standard IEC61131-3 programming languages and integrated Ethernet connectivity

SI-Apps Compact

Compatible module allows SyPTPro application programs to be re-compiled for HD

Unimotor HD High dynamic servo motor for pulse duty applications

- Patented rotor technology – High torque to inertia ratio for high dynamic performance
- Compact but powerful
- Parking brake available
- IP65 conformance: sealed against water spray and dust when mounted and connected
- Segmented stator design for high power density and compactness
- Supported by rigorous testing for performance and reliability
- Windings to suit 400 V and 200 V
- Rated speeds include 1,000 rpm – 6,000 rpm depending on motor size
- Customized motor build available

Unimotor HD – high dynamic servo motor for pulse duty applications

0.7 Nm to 85.0 Nm (255.0 Nm peak)

Unimotor HD is a high dynamic brushless AC servo motor range designed for use in pulse duty applications where rapid acceleration and deceleration is required.

High torque to inertia ratio

Unimotor HD has a high power to weight ratio, meaning that it can be easily integrated into the smallest, most demanding applications such as industrial robotics, pick & place and packaging.

For drive ratings, please see page 34 and motor ratings from page 38 to 43.

* Acceleration time to nominal speed is based on 1:1 motor to load inertia ratio

Modular multi-axis configuration

Dimensioning the common DC bus

4 easy steps to accurately dimension your system

- 1 Choose drive & motor combination
Based on speed and torque requirements see pages 25 or 26
- 2 Note nominal power & drive capacitance for each combination
- 3 Choose the drive to act as power supply for the drive group
Usually the largest drive
- 4 Check that:
 1. sum of drive capacitance \leq maximum capacitance**
 2. sum of nominal power \leq maximum input power**

(Refer to tables below)

Digitax HD drives have a higher capacity input power stage, allowing for a group of drives on a common DC bus to be powered by a single AC connection.

Alternatively, for larger configurations an external DC source can be used, such as a larger frame Digitax HD.

NOTE: The number of drives that can be connected on a common DC bus group depends on the total installed capacitance, the power rating of the input stage and the power profile of each axis.

There is also a limit of 10 drives for the 24 V link.

ADDITIONAL INFORMATION:

For optimized dimensioning please refer to the Installation and Technical Guide.

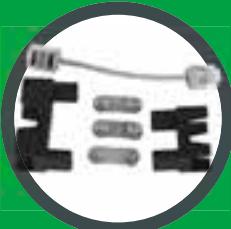

* External AC Line Reactor required. Please refer to the Installation and Technical Guide.

** If any of the values are exceeded, the system needs to be split in groups and the procedure repeated for each group.

200V		Max Capacitance (μ F)	Internal Capacitance (μ F)	Max Input Power (kW)

Digitax HD ordering information

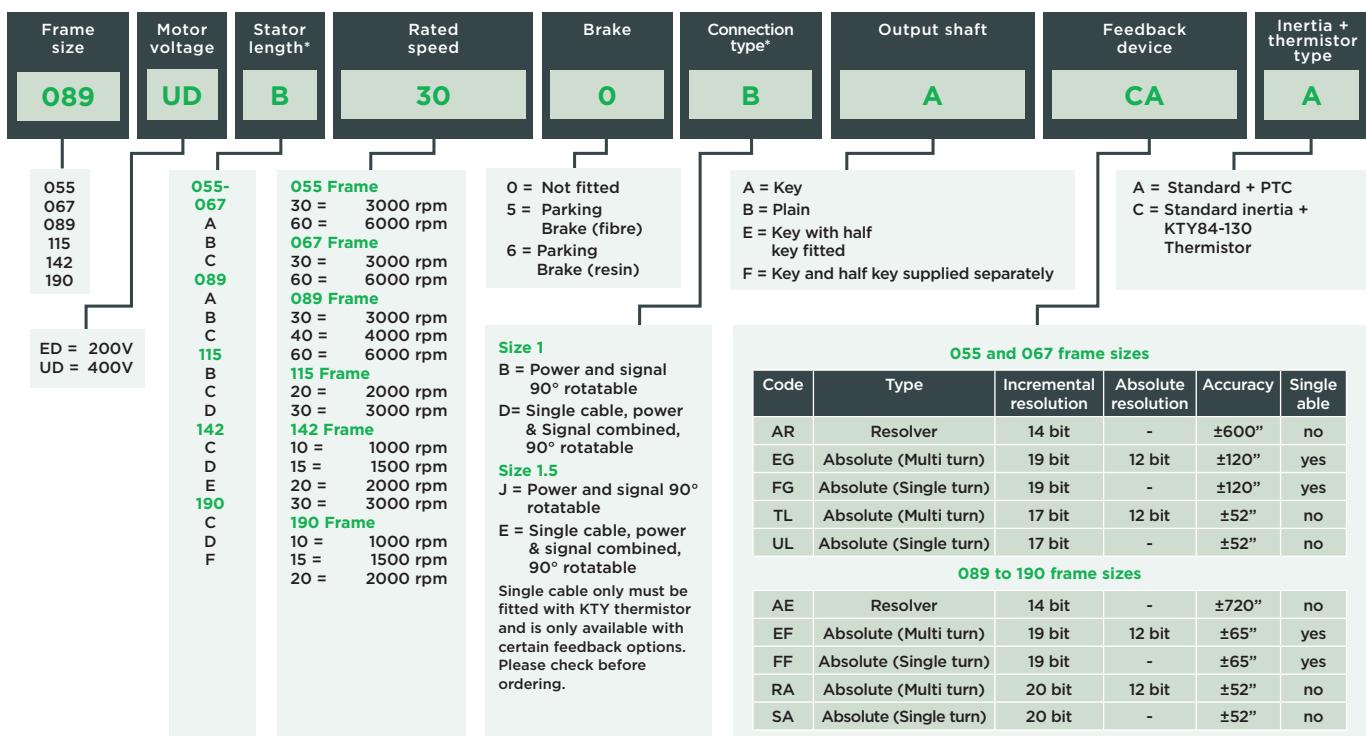

Drive part number key:

*For Ethernet and MCI versions, Option Modules are required separately. See page 29 for order codes.

Unimotor HD ordering information

Motor part number key:

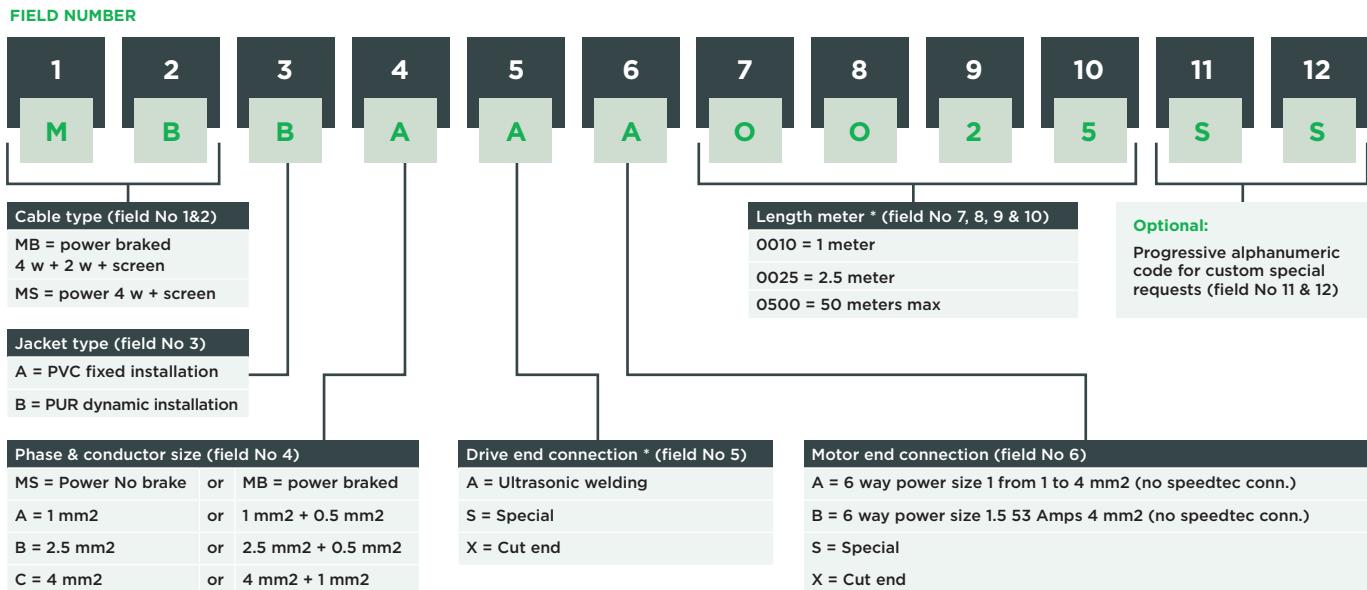

Additional feedback options available on request.

* For stator and connection length see page 38 - 43.

Cables and connections

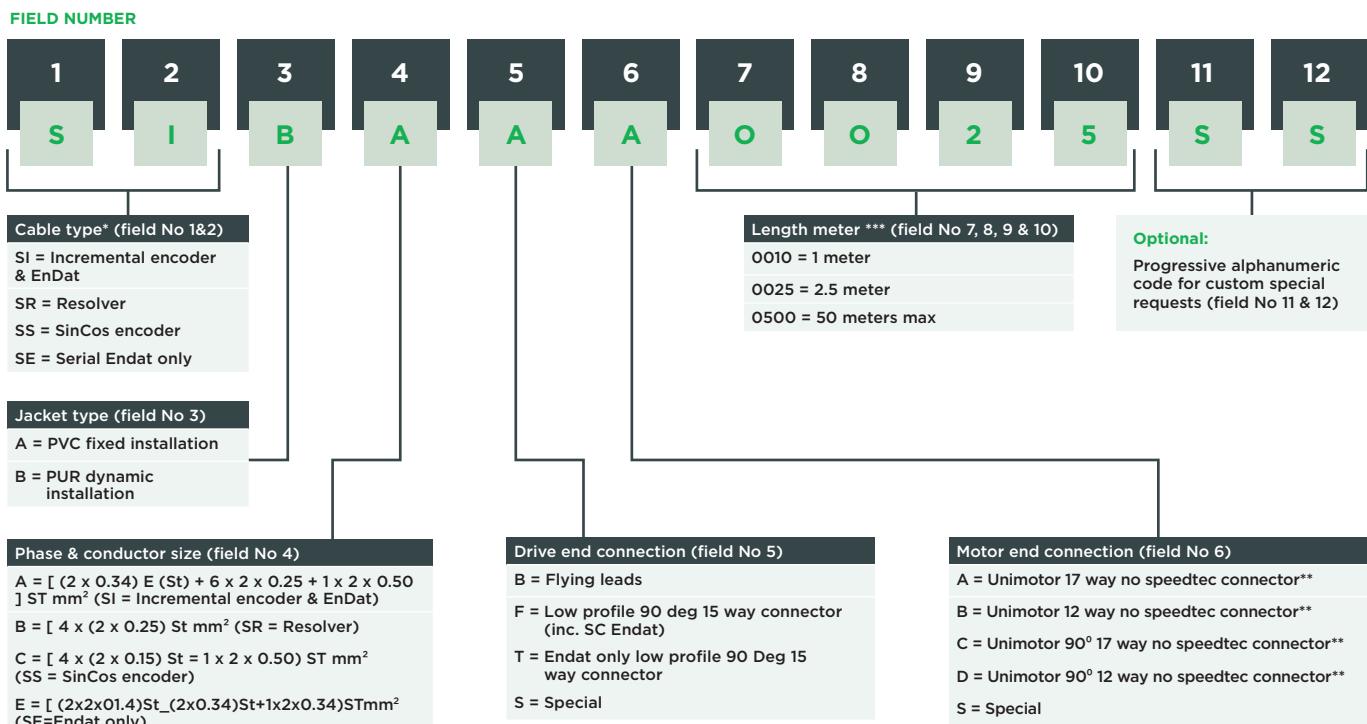

Power cable codification

(*Length meter / cable requiring (cm) lengths will be rounded up to the next highest half meter; Eg. 2.1 will be changed to a 2.5 meter cable)

Maximum cable assembly length 50 meters

Signal cable codification

* Based on feedback device (Unimotor HD order code): SR cable type for AE and AR feedback device, SE for EG and FG, SS for TL and UL, SI for EF and FF, and SS for RA and SA.

** Based on feedback device: 12 way for AE, AR, TL, UL; 17 way for EG, FG, EF, FF

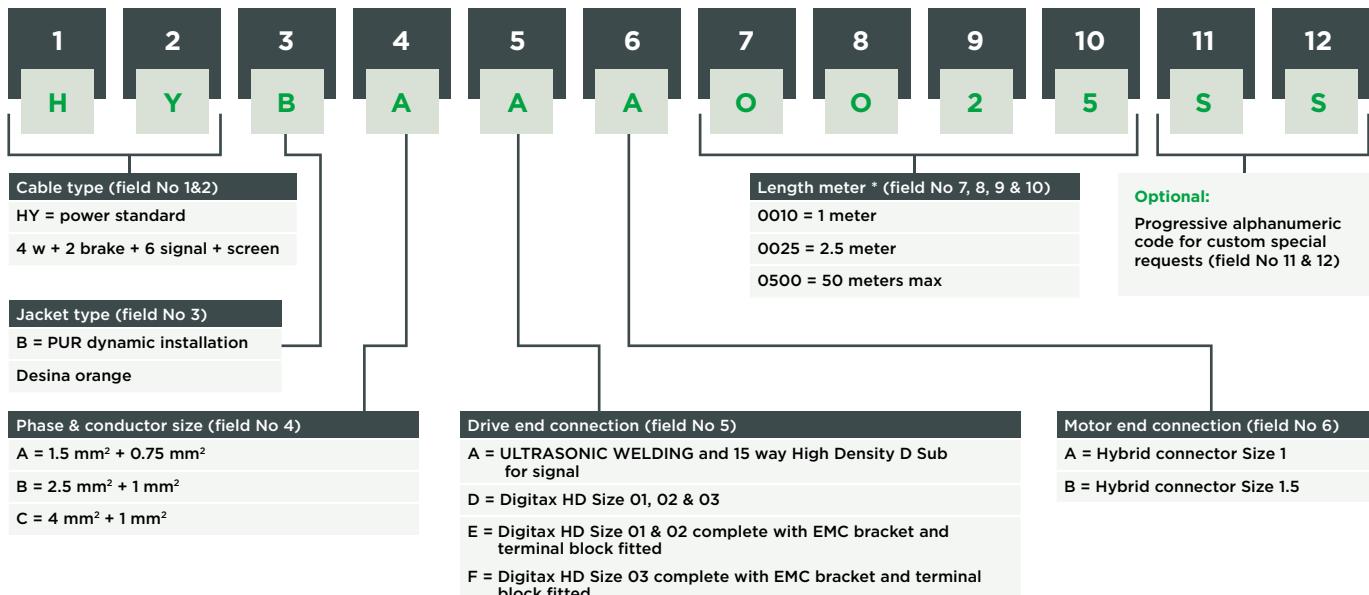

*** Length meter / cable requiring (cm) lengths will be rounded up to the next highest half meter; Eg. 2.1 will be changed to a 2.5 meter cable

Maximum cable assembly length 50 meters

Cables and connections

Hybrid cable codification

FIELD NUMBER

* Length meter / cable requiring (cm) lengths will be rounded up to the next highest half meter; Eg. 2.1 will be changed to a 2.5 meter cable
Maximum cable assembly length 50 meters.

Servo series specification

		M753 EtherCAT	M751 Base	M751 + SI-Ethernet	M751 + MCI210			
Performance	Update Rates	Current Loop Update: 62 µs						
		Speed Loop Update: 250 µs						
		Position Loop Update: 250 µs						
	Overload	*Closed-loop Overload: Maximum closed loop peak current for 0.25 s (from cold: 300 % for 8 s or 200 % for 60 s)						
		*Open-loop Overload: Maximum open loop peak current for 8 s (from cold: 150 % for 100 s)						
	Max Output Frequency	599 Hz						
	Switching Frequency	Configurable range: 2, 3, 4, 6, 8, 12, 16 kHz						
		Default: 8kHz						
	Adjustable Venting	Top venting or rear venting (with optional kit)						
	Intelligent Fan Control	Temperature controlled fan operation with user adjustable speed limit						
	Managed Internal Airflow	Managed airflow for maximum ingress protection						
Onboard Intelligence	Motion	Advanced Motion Controller			MCI210			
		Parameterised motion			Programmable motion			
		1.5 Axes			Up to 5 Axes			
		Positioning digital lock control			Positioning digital lock control camming			
		Real-time tasks						
	PLC	Onboard PLC			Onboard Machine Controller			
		IEC61131-3 programming (IL, LD, FBD, SFC)						
Control	Motor Control Modes	V/F, Open Loop Vector, RFC-A (Sensorless or Closed Loop), RFC-S (Sensorless Or Closed Loop)						
	Control Modes	Position control, speed control, torque control						
	Control Features	Stationary autotune for permanent magnet motors						
		Notch filter for suppression of mechanical resonances

Environmental safety and electrical conformance

Safety Testing

UL open class

Ambient temperature -20 °C to 40 °C as standard. Up to 55 °C with derating

Humidity 95 % maximum (non-condensing) at 40 °C

1,000 m to 3,000 m (3,300 ft to 9,900 ft) above sea level: de-rate the maximum output current from the specified figure by 1% per 100 m (330 ft) above 1,000 m (3,300 ft)

Storage temperature -40 °C to 70 °C

Mechanical Shock Tested in accordance with IEC 60068-2-27

Random Vibration: Tested in accordance with IEC 60068-2-64

Electromagnetic Immunity complies with EN 61800-3 and EN 61000-6-2

With onboard EMC filters, complies with EN 61800-3 (2nd environment)

EN 61000-6-3 and EN 61000-6-4 with optional EMC filter

IEC 60146-1 supply conditions

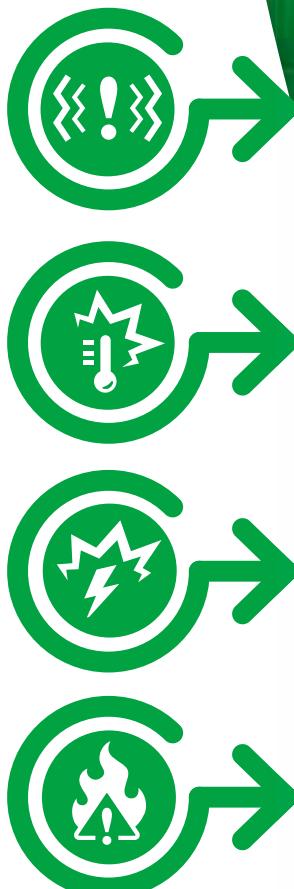

IEC 61800-5-1 (Electrical Safety)

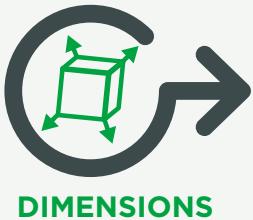

IEC 61131-2 I/O

Safe Torque Off independently assessed by TÜV to IEC 61800-5-2

SIL 3 and EN ISO 13849-1 PLE

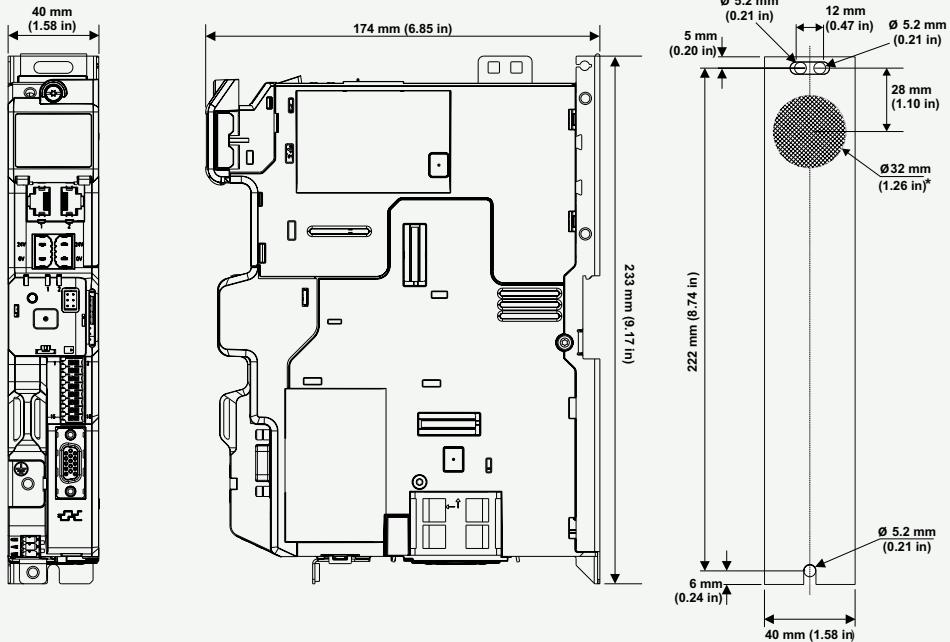

UL 61800-5-1 (Electrical Safety)

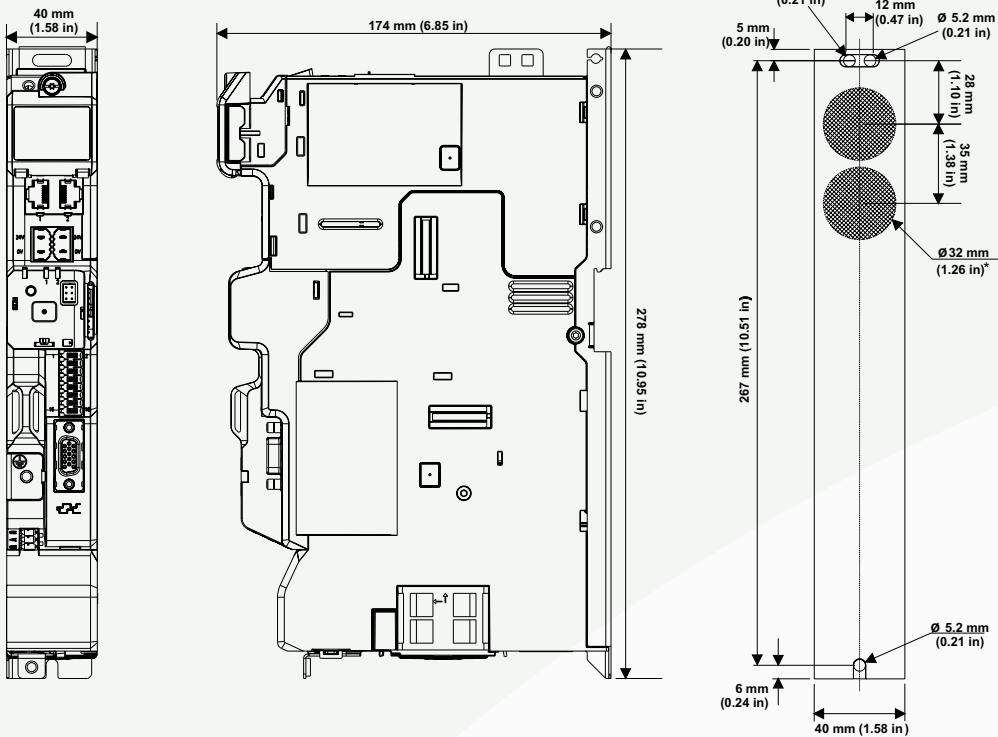

Digitax HD & Unimotor HD dimensions

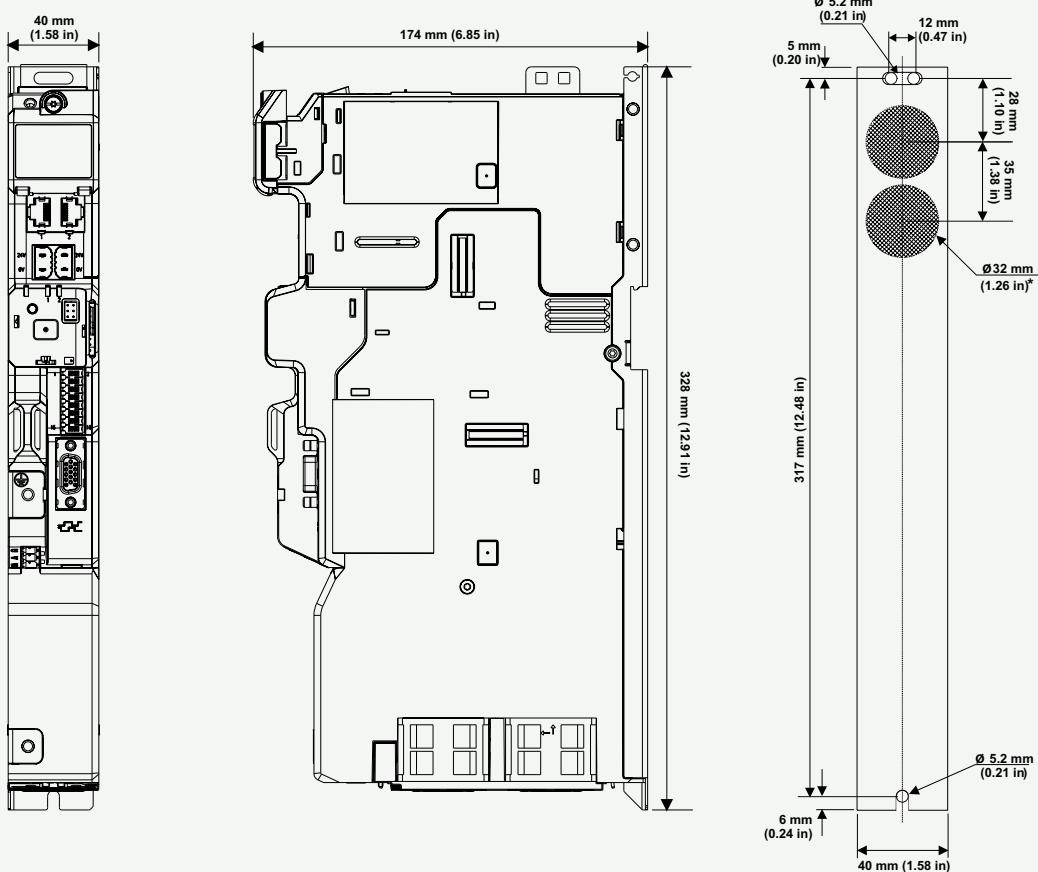

Frame 1

Frame 2

Frame 3

* Additional space above and below the drive may be required for cable routing.

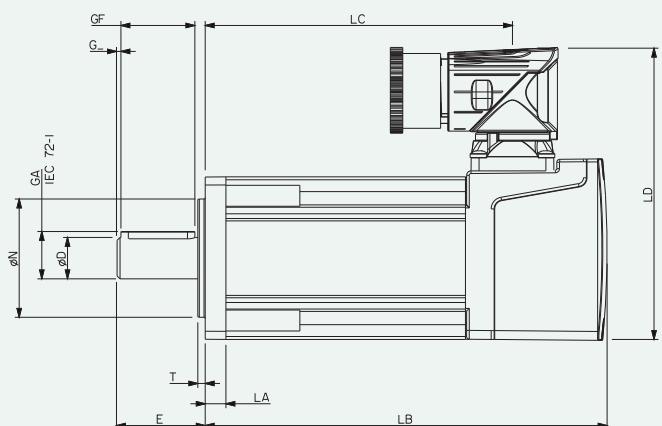

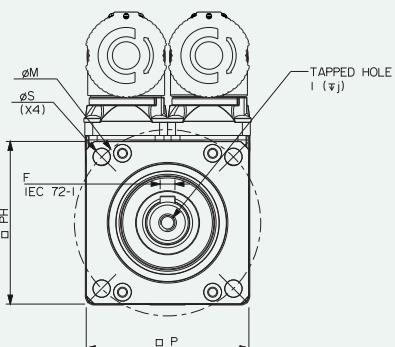

** Option module frame adds 22mm width.

*** Alternative screw mounting options available. Please refer to the Installation Guide.
